

## Product Name: Ethyl Acetate

---

### Product Summary

Ethyl acetate is a clear, colorless liquid used for solvents, paints, and ink.  
Highly pure ethyl acetate is also available as a special specification.

---

### Physical Properties

Appearance	Clear and colorless liquid
Odor	Aromatic odor, and irritating at high concentrations
Density	0.901 g/cm <sup>3</sup> (20°C)
Boiling point	77.1°C
Melting point	-83.8°C
Vapor pressure	10 kPa (20°C)
Solubility	Water: 8.1wt% (20°C)

\*The above figures are representative values and not guaranteed.

\*Please contact us directly for sales standards and safety data sheets.

---

### Type of Packing

Vessel	Please contact us.
Tank lorry	Please contact us.
Drum	180kg

---
